■ BrewBridge Café

Business & Loyalty Campaign Analysis — Q2 2025

Company Overview

BrewBridge Café is a fast-growing specialty coffee and café brand with outlets spread across multiple cities in India. The brand serves a diverse and loyal clientele through its physical café outlets as well as a mobile app and third-party delivery partners. At the close of 2024, BrewBridge launched a **Loyalty Rewards Campaign** to encourage repeat visits and increase customer spend. Management now wants to evaluate overall Q2 2025 business performance and measure the campaign's impact.

Available Data

File	Description
Customer_Information.csv	Customer profiles: ID, name, email, gender, age, city, region, membership tier, and join date.
Menu_Information.xlsx	All menu items: product ID, name, category (Beverages / Bakery / Meals / Specialty / Merchandise), selling price (INR), cost price, calories, and availability status.
Loyalty_Campaign_ Information.xlsx	Year-end loyalty campaign records: reward offer type, communication channel (Email / SMS / App Notification), campaign date, and expiry date for each targeted customer.
Order_Information.xlsx	All orders placed in Q2 2025 (April–June): order ID, date, customer, product, quantity, unit price, subtotal, discount applied, total amount, payment method, order type (Dine-In / Takeaway / Delivery), reward redeemed, and customer rating.

Your Role

You are working as a **Junior Data Analyst** at BrewBridge Café. The management team has tasked you with analyzing Q2 2025 sales and customer data and evaluating the effectiveness of the end-of-year Loyalty Rewards Campaign.

Your Objective

Using the provided dataset, analyze the data thoroughly and answer the following key business questions:

1. Customer Analysis

- How many unique customers placed orders during Q2 2025?
- What is the distribution of customers across regions, cities, membership tiers, and age groups?
- What is the average spend per customer for the quarter?

2. Sales & Menu Analysis

- Which menu items and categories were ordered most frequently?
- What is the total revenue generated in Q2 2025?
- Are there sales trends across order types (Dine-In / Takeaway / Delivery) or payment methods?
- How does average spend vary across membership tiers?

3. Loyalty Campaign Analysis

- How many customers who received a loyalty reward actually ordered in Q2 2025?
- Did campaign recipients spend more on average than non-recipients?
- Which reward offer type was most effective in driving sales or higher spend?
- What was the overall redemption pattern across different reward types?

4. Advanced Analysis

- Boxplots: Create box plots for Unit Price, Quantity Ordered, Total Amount Paid, and Customer Rating.
- Outlier Detection: Identify unusually large or small order amounts and explain their possible business context.
- Correlation Analysis: (a) Does a higher discount % correlate with a higher total amount? (b) Is there a relationship between quantity ordered and unit price? (c) Does customer rating correlate with any other variable?

Expected Deliverables

- **Data Cleaning Steps** — Handle missing values, duplicate records, and data-type issues.
- **Descriptive Statistics** — Mean, median, std deviation, and percentiles for key numeric fields.
- **Visualizations** — Bar charts, pie charts, box plots, scatter plots, and heatmaps.
- **Interpretations & Business Insights** — Derived from each section of the analysis.
- **Summary of Key Findings** — Covering customer behaviour, menu performance, and campaign effectiveness.

Important Notes

- *Maintain clarity and professionalism throughout your report.*

- *Every insight must be supported by relevant data and visualizations.*
- *Focus on both quantitative findings and their business implications.*
- *Be mindful of outliers and explain their significance in a café context.*

Remember: This project is not just about answering questions — it is about telling a clear, data-driven story that helps the BrewBridge management team make informed strategic decisions for the café's future growth!
